Face & Body

Botox® & Dysport®

Eliminate wrinkles and take years off your appearance with these temporary neurotoxin injectable that help smooth and lift the face.

Fillers

Injectable dermal fillers can plump thin lips, enhance shallow contours, soften facial creases, restore volume, remove wrinkles and improve the appearance of recessed scars. Ask our doctors about filler for under eye “bags”, jawlines and non-surgical nose jobs.

CoolSculpting®

This fat-freezing procedure is the only FDA-cleared, non-surgical fat-reduction treatment that uses controlled cooling to eliminate stubborn fat. The results are proven, noticeable, and lasting.

Collagen Induction Therapy (CIT)

Also known as micro-needling, CIT is a procedure that improves the appearance of wrinkles, acne scars, brown spots and stretch marks by stimulating the skin’s natural ability to repair itself.

Platelet Rich Plasma (PRP)

As a regenerative technique that accelerates the body’s natural healing processes, in conjunction with CIT, the treated area of skin can restore and rejuvenate for a firmer, more youthful texture and flexibility. PRP is also used with hair restoration.

Laser Hair Removal

The Lumenis LightSheer is the gold standard when it comes to hair removal. Treatments are fast and comfortable. Most people will need between 5-8 treatments, spaced approximately 6-8 weeks apart.

miraDry®

miraDry is the only FDA-cleared noninvasive treatment that will free you from the bothersome problems of excessive underarm sweat and odor. No more concerns about deodorant!

Intense Pulse Light (IPL)

Intense Pulse Light – IPL therapy uses high intensity light to improve the appearance of vascular lesions, broken facial capillaries, rosacea, freckles, hyperpigmentation, sun damage, fine lines, wrinkles and removes unwanted dark hair.

Skin Tightening

Viora® uses revolutionary CORE technology (a non-invasive radio frequency) to tighten loose and sagging skin. Viora gently heats your skin’s underlying network of collagen and elastin fibers causing them to shrink, restoring elasticity and leaving your skin with a tighter, smoother appearance. Treatments are customized for each patient, taking between 30-45 minutes. For the best results 6-8 treatments are needed.

Cellulite and Body Contouring Treatments

Viora® radiofrequency energy targets enlarged fat pockets to reduce fat cell volume and increase local blood circulation and lymphatic drainage, producing a tighter smoother appearance in the skin. V-Form can be performed on the stomach, buttocks and thighs.

KYBELLA®

This FDA-approved injectable treatment destroys fat cells in under the chin area to improve your profile.

Skin Care

Reveal your glow by indulging in our highest quality medical grade facial therapy and skin care products.

Chemical Peel

Peel away years of sun damage, dark spots and wrinkles to reveal radiant and renewed skin.

Dermaplaning

Removes facial peach fuzz also known as vellus hair, while gently lifting dead skin cells. Results last 3-4 weeks and is an excellent add-on to a HydraFacial treatment or Peel.

HydraFacial®

Only HydraFacial® uses patented technology to cleanse, extract, and hydrate. HydraFacial® super serums are made with medical-grade ingredients that rejuvenate and resurface the skin creating an instantly gratifying glow.

“Triple Crown” HydraFacial

Dermaplaning + HydraFacial + LED Light therapy
